wine valleys of the River Rhine.

# GERMANY'S Rhein River Valley

**Discover the Mysteries, Geomancy, Legends, Nature, Wine and Food of one  
of the most enchanting regions of the world.**

The Valley of the River Rhine is the energetic spine of Europe, and the natural border of Empires and Kingdoms. It represents many historical stages in the development of European civilization. It is called the "Father of Rivers" and the Romantic authors chose it as the ideal countryside and revived many old legends

in their novels, music and paintings. Prussian kings, German poets and British painters discovered the gorge's timeless beauty.

The river is never small, it does not start as a little stream flowing out from a spring, instead it flows powerfully westward out of a large lake - the Bodensee between Switzerland and Germany.

# Join Roger and Eva on a wine and story journey of a lifetime!

## The River

The river turns north at Basel and continues 1230 km until it reaches the North Sea with an exception of some 40 km between Mainz and Bingen, where it starts going west again. With this direction it forms ideal conditions for growing wine on its steep hillsides.

This is Germany's landscape at its most dramatic - forested hillsides alternate with craggy cliffs and near-vertical terraced vineyards. Idyllic villages appear around each bend, meandering between hillside castles and steep fields of wine-producing grapes to create a magical spell of beauty and legend.

This is the Romantic Rhine, a powerful stretch of the river slashing a deep and scenic gorge.

## Wine Culture

The soil is lime and clay dominated in the wine valleys, which absorbs the sun's heat and retains it overnight. These sites are often extremely steep so they catch the most sunlight, and are difficult to harvest mechanically, so a lot of manual labour is needed to produce the wine. The vineyards are extremely small compared to new world vineyards, making the wines produced long and complex, and many wines hard to obtain as production is limited.

Wine has been grown here since Roman times. The wine is better known than all of the many legends. We will be experiencing many varieties of wine, and visiting many wineries, both on and off the beaten track.

There are stories you will learn on the tour about the Rhine wines. The white wines belong to the best wines

in the world. The Riesling is called the king of wines, and even the red ones are of very good quality. The local wine growers are very proud of their products, history and skills. There are many wonderful wine-bars, restaurants, family hotels and many wine-routes that lead from one interesting wine-house to another!

There are 13 wine areas in Germany, 11 of them lie in the Rhine Valley. The wine always goes with good food and it is difficult to find a bad restaurant in places like the Rhine Valley. The valley is not only ideal for wine growing, it is also a perfect place for living and has been inhabited since the beginning of humankind. Simple walking in the valley is like reading a lively and interesting history book.

## The History, Legends and Romance

The sheer bulk of history that has poured through this river valley rouses your romantic soul. It was here that the ancient Romans decided to call it an empire and draw the line that defined their vast holdings, separating the 'barbarians' from the civilized world. It was here that Prussian General von Blücher used an innovative pontoon bridge to cross the Rhine and flank Napoleon's forces (on their way back from a disastrous Russian campaign).

All along the Rhine, it seems each castle and every rock comes with a story. It is easy to "see" the romantic dreamers rafting on the river, medieval nights riding their horses between the castles and fortresses, early saints coming to Christianize the pagan inhabitants, Roman soldiers protecting their camps against German tribes, Celts producing the first pottery and glassware, older people (nobody knows who they were) building their first stone and rock sanctuaries.

It is easy to imagine the legendary Nibelungs, heroes, dragons and water maids or sirens combing their golden hair over the river. The Gothic church steeples are seemingly plucked from the world of fairy tales.

There are many interesting hints about the history in the old legends, sometimes actually more accurate than official history! Many interesting discoveries can be made between the old trees, buildings, castles, rocks, and along the paths and walls. Anyone with a romantic soul should try to "read" them. An old German saying states: "If you do not like the valley of Rhine, there is something seriously wrong with you."

## World Heritage

In 2002, Unesco designated these 65 kilometres of riverscape, more prosaically known as the Oberes Mittelrheintal, as a World Heritage Site. The Rhine Valley is a Germany storybook, a fairy-tale world of legends and medieval castles and villages, great food and wine, adventures, walks and talks.

## Tour Features

With Germany being the most northerly of all wine-growing countries, the diversity of German wines will impress every wine lover. German wines are all produced around rivers, mainly the Rhine and its tributaries. Grapes are often cultivated on the steep slopes so that they will make the best use of the sunlight. On this tour to the Rhine Valley and the smaller, surrounding valleys of the Nahe, Mosel and Ahr rivers, we will learn to understand the subtle differences which distinguish the wines from these appellations.

# Your guides

EVA LENOVA, is a translator, interpreter, lecturer, author and guide. Her life-long interest in history, traditions, wisdom, art and science of our ancestors and fascination with metaphysics formed a good base from which she was able to start her five years of working and studying with American historian, Vincent Bridges. She supported him in his search for evidence and resources for his books, guided him to places connected to his work in Czech, and interpreted and helped to organize numerous seminars, workshops, lectures and pilgrimages both in Czech and abroad. Their alchemical walks in Prague were rather popular, a number of sacred geometry students enjoyed their magical rituals in the church at Zelena Hora as well as the labyrinth workshop near Cesky Krumlov. An enthusiastic group participated in the winter solstice 2012 ritual in Prague

and a bunch of adventurers joined them to their South France tours (Gypsy festival in Stes-Maries-de-la-Mer, Nostradamus, Grail quest and Cathars in October 2010 and May 2012) and to their last public event - Moravian Michael-and-Mary lay line pilgrimage, as Vincent loved to call it.

Eva continues guiding groups of people to power places, leads rituals, organizes pilgrimages and tours to traditional festivals, on special occasions or with special themes such as South France 'in the footsteps of the Magdalenes'. She is a member of the Czech Academy of Healing Nutrition team writing articles, teaching practical classes and guiding trips.
