

SACRED GEOMETRY

Event of the Year

April 4-13th, 2014 New York City

If you are interested in unravelling the mysteries and secrets of the Universe, then this is the event you cannot afford to miss.

A celebration of Sacred Geometry with expert teachers, featuring **Scott Olsen Ph.D, Robert Lawlor (Aust), Lance Harding Ph.D, Steve Bass, Mark Hanf, Dorothea Rockburne, Frank Vedegys, John Lloyd, Karl Lorenzen** and webinar link up via South France with **Dan Winter** and **Bill Donovan**.

Sacred Geometry is the blueprint of Creation and the genesis of all form. It is an ancient science that explores and explains the energy patterns that create and unify all things and reveals the precise way that the energy of Creation organizes itself. On every scale, every natural pattern of growth or movement conforms inevitably to one or more geometric shapes. Mother nature uses geometry everywhere you look, from the spirals of the nautilus shell, galaxies, sunflowers, snowflakes, flower petals, honeycombs and the deepest design of the smallest particles known to humanity! Sacred Geometry is the modern bridge between Science, Physics and Spirituality.
